Releases

You can download the latest released tarballs of the following subprojects from the sigrok.org download directory:

Project	Release/download	News
libserialport	libserialport-0.1.2.tar.gz	release notes
libsigrok	libsigrok-0.5.2.tar.gz	release notes
libsigrokdecode	libsigrokdecode-0.5.3.tar.gz	release notes
sigrok-cli	sigrok-cli-0.7.2.tar.gz	release notes
PulseView	pulseview-0.4.2.tar.gz	release notes
sigrok-firmware-fx2lafw (source code)	sigrok-firmware-fx2lafw-0.1.7.tar.gz	release notes
sigrok-firmware-fx2lafw (prebuilt firmware)	sigrok-firmware-fx2lafw-bin-0.1.7.tar.gz	release notes

Binaries and distribution packages

Linux Appliance binaries

- Nightly Appliance binaries (oldest distro supported is Ubuntu 18.04):
 - pulseview-NIGHTLY-i686-debug.Appliance (32bit)
 - pulseview-NIGHTLY-x86_64-debug.Appliance (64bit)
 - sigrok-cli-NIGHTLY-i686-debug.Appliance (32bit)
 - sigrok-cli-NIGHTLY-x86_64-debug.Appliance (64bit)
- Download the correct (32bit or 64bit) Appliance file for your Linux system, make the file executable via "chmod +x" and then run it.
- If you want to access hardware, please install the udev rules on your system and reload the rules using "udevadm control --reload-rules && udevadm trigger".
- See also Linux for more information.

Linux distribution packages

- Debian:** sigrok (pulls libserialport, libsigrok, libsigrokdecode, sigrok-cli, pulseview, sigrok-firmware-fx2lafw)
- Ubuntu:** sigrok (pulls libserialport, libsigrok, libsigrokdecode, sigrok-cli, pulseview, sigrok-firmware-fx2lafw)
- Arch Linux:** AUR (Arch Linux User Repository), libserialport, libsigrok, libsigrokdecode, sigrok-cli, pulseview, sigrok-firmware-fx2lafw
- Slackware:** libserialport, libsigrok, libsigrokdecode, sigrok-cli, pulseview, sigrok-firmware-fx2lafw
- Fedora:** libserialport, libsigrok, libsigrokdecode, sigrok-cli, pulseview, sigrok-firmware-fx2lafw, sigrok-firmware
- Gentoo:** libserialport, libsigrok, libsigrokdecode, sigrok-cli, pulseview, sigrok-firmware-fx2lafw
- openSUSE:** Latest stable versions are included in Tumbleweed. Leap includes the latest stable version at time of release, newer versions are available from the "electronics" repository, created by the OpenBuildService (OBS).
 - openSUSE weekly GIT Repositories, OBS Project

Windows

- Nightly installer binaries (require Windows XP or higher):
 - pulseview-NIGHTLY-i686-release-installer.exe (debug build)
 - pulseview-NIGHTLY-x86_64-release-installer.exe (debug build)
 - sigrok-cli-NIGHTLY-i686-release-installer.exe (debug build)
 - sigrok-cli-NIGHTLY-x86_64-release-installer.exe (debug build)
- See also Windows for more information.

Mac OS X

- Nightly DMG binaries (64 bit x86 only; require OS X 12 Mojave or higher):
 - pulseview-NIGHTLY-x86.dmg
 - sigrok-cli-NIGHTLY-x86.dmg
- See also Mac OS X for more information.

FreeBSD

- libserialport, libsigrok, libsigrokdecode, sigrok-cli, pulseview, sigrok-firmware-fx2lafw, sigrok-firmware, sigrok-firmware-utils

OpenBSD

- libserialport, libsigrok, libsigrokdecode, sigrok-cli, pulseview, sigrok-dumps, sigrok-firmware-fx2lafw

Android

Note: Not provided as of Sept 2023 due to limited project manpower and low user interest. If you're interested in improving the user experience on Android, please come and chat with us!

- Nightly APK binaries:
 - PulseView-NIGHTLY.apk (ARM)
- See also Android for more information.

Source code

The development is done in various git repositories.

See Building for build instructions.

Example data

See the Example dumps wiki page.

Firmware files

See the Firmware wiki page.
